Hi School!

Connect the families to their school

Target

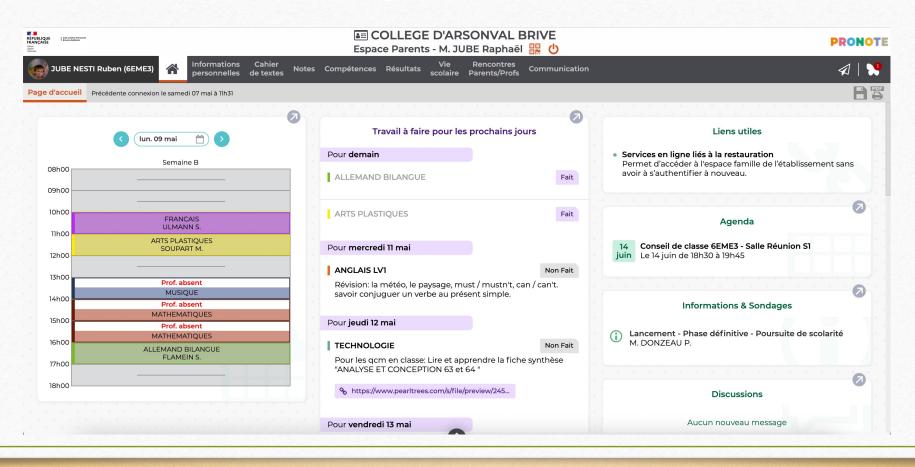

Customers: all educational establishment and their administrations.

Users: all people involved int school life (pupils, students and their parents, teachers, administration,...)

Why?

- Too much channels of communication between parents and the school: emails, notes in the pupil's notebook, papers...
- Challenges:
 - One app already exists but seems too expensive for most of establishments.
 - Find the potential improvements, new services, better design...

Example of a current app.

Solution

- One app for all information, communication between pupils/parents and the administration/teacher.
- Share all information and provide useful tools: agenda day-by-day, homework, communication with teachers or administration (with moderator), notes, news of the establishment,...
- This app should be used in all schools: primary, middle and high school.
- Can include a free video app for remote courses or meetings.
- Professionals' survey on going.
- Open for new ideas!

Welcome on board!
